DANIEL SANMI OMOWOLE

Frontend Software Engineer

Lagos, Nigeria | +234 813 858 0959 | sanmidaniels07@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Frontend Software Engineer with 4+ years of experience designing and building performant, accessible React/Next.js interfaces across fintech, healthcare, and enterprise platforms. Specializes in translating complex workflows — credit and KYC pipelines, membership and payment systems — into responsive, production-ready UI, with deep expertise in component architecture, state management, and data-fetching patterns (React Query, Zustand, Hookstate, Redux). Skilled at optimizing page-load performance through code-splitting, caching, and lazy loading, and comfortable working directly against REST APIs and light backend integration when needed.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Mantine UI, Material UI, Redux, Zustand, Hookstate, React Query (TanStack Query), React Native, Vite.js, Framer Motion, SEO Optimization

UI/UX Practices: Responsive & Component-Driven Design, Design Systems, Accessibility, Cross-Browser Testing, Performance Optimization (code-splitting, lazy loading, caching)

API & Backend Familiarity: REST API Integration, JWT Authentication, Node.js, Express.js, PostgreSQL, Prisma ORM, Supabase, Firebase

Practices: Unit & End-to-End Testing, Agile Workflows, Git/GitHub, Code Review, Cross-Functional Collaboration

CORE COMPETENCIES

Problem Solving & Debugging • Team Collaboration • Clear Communication • Cross-Functional Collaboration • Ownership & Accountability • Adaptability • Attention to Detail • Time Management • Constructive Code Review • Mentorship & Knowledge Sharing

PROFESSIONAL EXPERIENCE

Frontend Developer (Contract) 2026 – Present

DayMate — Lagos, Nigeria

- Building the frontend for a birthday-based social networking app with Next.js 15 and Tailwind v4, from architecture through shipped features.
- Elevated the UI across home, communities, chat, stories, profiles, discover, notifications, and onboarding, using React Query, Zustand, and Framer Motion for state and motion.
- Shipped a Stories UI with reply-to-story messaging, social following/followers with privacy gating, and Cloudinary-backed cover photo uploads with cache-busting.
- Worked directly against the Express/Prisma/Supabase API to integrate community sync, stories, and social features end-to-end.

Frontend Developer March 2024 – Present

EVEA — Lagos, Nigeria

- Design and build responsive, production-grade interfaces for a fintech credit, treasury, and financial-control platform used by growing businesses to spend, manage, and access capital, using React, TypeScript, and Tailwind CSS.
- Integrate RESTful APIs with TanStack Query to power credit scoring, identity verification, and payment gateway workflows, handling complex data fetching, caching, and background synchronization.

- Own end-to-end multi-step KYC flows — document uploads, real-time validation, and conditional form logic — reducing friction and errors in credit application journeys.
- Implement frontend security best practices, including input validation, secure authentication flows, and XSS prevention, to protect sensitive financial and identity data.
- Manage global application state with Hookstate and improve page-load performance through code splitting and lazy loading.
- Write and maintain unit and end-to-end tests to safeguard application reliability ahead of releases.

Frontend Engineer (Contract) April 2025 – July 2026

CIPMN — Chartered Institute of Project Managers of Nigeria — Lagos, Nigeria

- Developed the frontend for an enterprise platform managing Accredited Training Provider (ATP) records, membership data, payments, and project workflows.
- Built a multi-tab payment management UI spanning License Renewal, Membership Renewal, Annual Conference, and MCDP payment types, with enum-based routing and status filtering (approved/pending/declined).
- Designed a role-based permission layer on the frontend — a custom usePermissions hook and hasPermission() access-control utility — to govern ATP profile management and protect sensitive actions.
- Built PDF, Excel, and CSV export utilities for invoices and ATP snapshots (jsPDF, jsPDF-AutoTable, xlsx, file-saver), including dual-logo branding and currency-formatting fixes for print-ready documents.
- Developed a Corporate Membership (CM) project management module with nested routing, reusable project-card components, and a staff/date-range filter modal to streamline internal case tracking.
- Built membership filtering UI with interval-based date ranges and country-based location filters, improving staff visibility into membership status.
- Integrated React Query platform-wide for paginated data fetching, optimistic updates, and background refetching, improving perceived performance across high-traffic modules.

Full-Stack Developer June 2023 – November 2023

Quickmed Emergency Services — Abuja, Nigeria

- Built responsive interfaces for a hospital management system serving both healthcare providers and patients, using React and Tailwind CSS.
- Integrated Firebase for real-time data storage, authentication, and live status updates, ensuring secure and seamless data flow across all user roles.
- Collaborated cross-functionally with backend teams to integrate RESTful APIs and conducted end-to-end testing to ensure full responsiveness across devices.

Frontend Developer August 2022 – August 2023

Bulb Africa — Lagos, Nigeria

- Built and maintained React/TypeScript frontends across multiple client projects, consuming RESTful APIs for data fetching and persistence.
- Built reusable component libraries in React to accelerate feature development across projects and integrated third-party services in partnership with UX/UI designers.
- Participated in code reviews and automated testing to uphold code quality standards across the team.

Software Engineer Intern February 2021 – June 2022

Techstudio Academy — Lagos, Nigeria

- Completed an intensive full-stack web development program, building production-ready applications with HTML, CSS, JavaScript, and React.
- Developed custom websites with reusable components, integrated third-party APIs, gaining hands-on experience with Git, Agile workflows, and professional development practices.

EDUCATION

Bachelor of Technology, Food Engineering September 2017
Ladoke Akintola University of Technology — Ogbomoso, Oyo State | GPA: 3.68/5.0

Diploma in Computer Science January 2012
Ladoke Akintola University of Technology

CERTIFICATIONS

Advanced Software Engineering March 2022
Bulb Africa — Yaba, Lagos

Full-Stack Web Development December 2020
Techstudio Academy — Lagos
